Details

Description

Sweeps five times faster than a conventional broom. No need to bend. Ergonomic features. Space-saving storage. These are just a few of the advantages that speak for the S 750 sweeper from Kärcher. This rugged, unbreakable and corrosion-resistant sweeper is easy to push and very easy to manoeuvre. Dust and dirt are safely contained in the on-board waste container: easy, quick and clean! The S 750 features a powerful roller brush and side brush with a total working width of 700 mm. The side brush has extra long bristles for cleaning in corners and edges. The contact pressure of the folding side brush can be infinitely adjusted with a knob. The push handle can be adjusted to two different heights for easy use. With fold down push handle for quick and easy space-saving storage: simply fold down the push handle and place the sweeper upright. That's all. The self-standing waste container is stable and easy to remove. S 750 - powerful and convenient.

Application

Easy cleaning of pathways, roads, yards, driveways and garages.
